

GET STARTED WITH CLAUDE

PART 2

Five more things, one more sitting. Where to click to make it actually build things, not just answer questions.

WHY THIS ORDER

The toggle unlocks everything else. Skip it and skills, tools, and schedules all stay locked.

1 TURN ON THE SETTINGS THAT UNLOCK EVERYTHING ELSE

Settings, then Capabilities. Turn on **code execution and file creation**. Free through Enterprise, on by default for Free, Pro, and Max. 30 seconds.

2 INSTALL CLAUDE IN CHROME AND PIN IT

Chrome Web Store, published by Anthropic. **Beta, Pro and up**. Pin it or you'll forget it exists by Thursday. Reads the page, fills your forms.

3 BUILD A SKILL BY TALKING TO CLAUDE

Say "make me a skill for the thing I explain over and over," upload real examples, answer its questions. No code, no terminal.

4 BUILD A TOOL AND PUBLISH IT

Describe the problem, not the code. It builds next to the chat. **Free, Pro, and Max publish instantly**. No account needed to open the link.

5 CREATE A SCHEDULED TASK

Claude Cowork, then Scheduled, then New task. **Rolling out in beta, Max first**. Runs while your laptop is closed.

IF YOU ONLY DO ONE THING

The toggle. Everything on this page stays greyed out until you flip it.

*flip it
first, ask
questions later*
